CloudBridge

RMM EVALUATION CHECKLIST

Put the fleet under the lens.

The front door is one side of the story. Device health, policies and support are the other. Ask the questions that connect them.

What CloudBridge shows

Inside
Your own answers

Ask hard questions. Check real screens.

Start with the questions your team needs answered. Then connect each one to the CloudBridge view that helps you answer it, and keep using the knowledge your IT team has invested 30+ years in.

QUESTIONS TO EVALUATE	WHAT CLOUDBRIDGE SHOWS
Can it replace our current RMM?	Yes. CloudBridge RMM runs on servers and workstations and can replace an existing RMM
Do we need Intune?	No. CloudBridge works with or without Intune
Can I see fleet health at a glance?	Overview: total devices, online/offline, policy compliance, endpoint health
Can I set each group's cloud workspaces and apps?	Device-group compliance and assigned launcher policies
Do I know whether config changes landed?	Configuration Sync panel: "Synced", with compliance detail
How are patches tracked?	Software Updates: up to date, in progress, pending, failed
Can I deploy apps and see failures?	Application Deployment: installed, in progress, failed
Can I see device context in a ticket?	Linked device and device state in ticket detail
Is security status visible?	Defender Protection panel; Security page
Are alerts, reports and tickets in one place?	Ticket queue with status, priority and assignment; Alerts and Reports navigation
Can the team follow a support conversation?	Ticket detail with messages, assignment and priority
Can I see recent administrative activity?	Recent Activity with time, user and activity

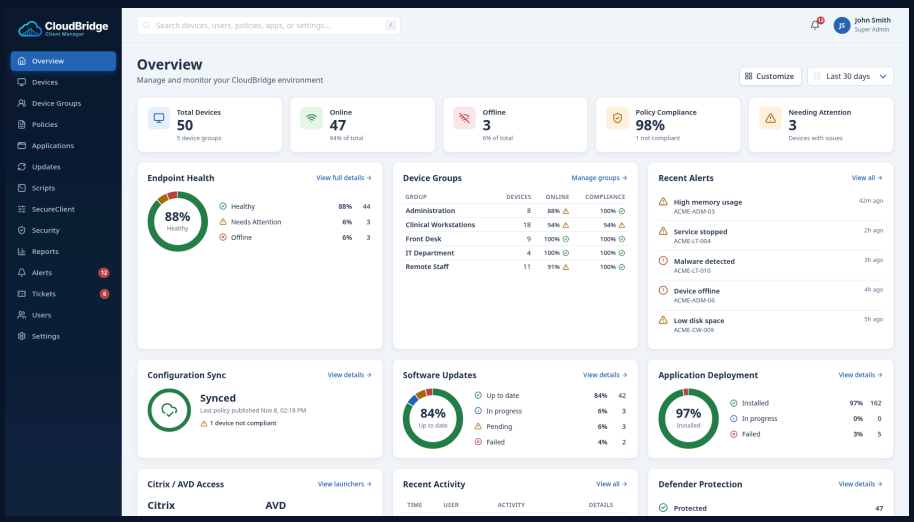

FROM
$89
PER DEVICE, FIRST YEAR
Renews at half price.

CloudBridge RMM + SecureClient. The RMM runs on servers and workstations and can replace your existing RMM. SecureClient goes on the workstations you choose. All supported Windows versions except Windows 11 Home. Available Jan 1, 2027.

CLOUDBRIDGE RMM · THE IT VIEW

The fleet, in focus.

Overview · device status, compliance, groups and recent alerts.

Overview lower · sync, updates, app deployment, activity and Defender status.

Questions only you can answer

- [ ] Which reports does my team actually read each week?
- [ ] Who owns alerts after hours?
- [ ] Which PCs should become locked-down endpoints for your cloud desktops, and what will each user do there?

See it on your own PCs: deets@cloudbridgermm.com · cloudbridgermm.com
